ALL INDIA AUTO LPG DISPENSING STATION (ALDS)
DIRECTORY

2013

Eco Friendly Clean & Green Driving

MISSION

Promote in an integrated manner, the use of Auto LPG as an environment-friendly, safe, alternate and cost-effective transportation fuel in India, involving all stakeholders, and using the best global practices.

Today Auto LPG is available in more than 500 cities with a network of close to 1100 stations, which makes it the most widely available alternative fuel. This has encouraged an increasing number of vehicle owners to convert to Auto LPG, an economical & environment friendly fuel – paving way for India to become one of the leading Auto LPG markets of the world in the next few years.

Low costs of infrastructure and conversion, easy availability, versatility of use and of course, an impeccable safety record makes Auto LPG a viable, un-adulterable, environment friendly alternative auto fuel in India.

IAC, a member of “Central Motor Vehicle Rules - Technical Standing Committee” (CMVR-TSC) “Standing Committee on Emission Legislation” (SCOE) , & TED26 (Bureau of Indian Standards), Government of India, is widely recognized as the nodal body for the Auto LPG Industry in India with practically all major stakeholders on Board. IAC membership base is expanding rapidly and we have the Oil Sector PSUs, Private LPG Marketers, Kit Suppliers, Equipment Manufacturers and Turnkey Installers as members, in addition to a very proactive support of World LP Gas Association, USAID, ARAI and SIAM.

Consistent efforts are made by IAC to increase awareness among the general public and government bodies through Seminars, Workshops. Many such workshops have been organized for several State RTOs like Maharashtra, Karnataka, Department of Legal Metrology, ARAI and with PESO. IAC is also represented in World LP Gas Association and has participated in its activities around the world. IAC has also initiated very meaningful interactions with leading OEMs, which has resulted in more than 15 OE LPG vehicles running on Indian roads today.

*A unique coalition with all the critical stakeholder groups
working together closely*

AUTO LPG : Promise for a Cleaner Air

Auto LPG: The World

About 60% of the world's LPG output is got from natural gas processing and only 40% comes in from crude refining resulting in an increased energy security for gas rich nations like India.

More than 13 million vehicles run on Auto LPG globally, supported by close to 52,000 LPG Filling Stations. Global Auto LPG consumption exceeds 20 Million Tonnes, in comparison to India still at about 0.35 Million Tonnes level. South Korea leads the world in the usage of this clean Auto Fuel with sales of more than 4 million tones. Other nations which have successfully adopted this green fuel for their transportation requirements are Turkey, Poland, Japan, Australia, Italy, Mexico, USA, Russia & China.

Low costs of infrastructure and conversion, easy availability, versatility of use and of course, an impeccable safety record makes Auto LPG the only viable, un-adulterable and environment friendly alternative auto fuel in India.

What is LPG?

LPG is a clean, high octane, abundant and eco-friendly fuel. LPG is obtained both from natural gas processing through fractionation and from crude oil refining. It is a mixture of petroleum gases like ethane and butane.

LPG is a gas at atmospheric pressure and normal temperatures, but it can be liquefied when moderate pressure is applied or when the temperature is sufficiently reduced. This property makes LPG an ideal energy source for a wide range of applications, as it can be easily condensed, packaged, stored and utilised. When the pressure is released, the liquid makes up about 270 times its volume as gas, so large amounts of energy can be stored and transported compactly.

Can Auto LPG be used legally?

The use of LPG as an automotive fuel has become legal in India with effect from April 24, 2000 with the prescribed safety terms and conditions. Hitherto, the thousands of LPG vehicles running in some Indian cities had been doing so illegally by using domestic LPG cylinders, a very unsafe practice. Using domestic LPG cylinders in automobiles is illegal.

AUTO LPG : Promise for a Cleaner Air

Why LPG as an alternative fuel?

LPG impacts greenhouse emissions less than any other fossil fuel.

LPG is a clean burning, high octane and an environment friendly fuel.

In one of the studies, findings state that LPG vehicles emit significantly less pollution than their diesel and petrol fuel counterparts.

Auto LPG Emissions*

A brief comparison of vehicular emissions of Auto LPG vis-à-vis Petrol and Diesel is:

Compared to Petrol	Compared to Diesel
75% less Carbon Monoxide	90% less Particulates
85% less Hydrocarbons	90% less Oxides of Nitrogen
40% less Oxides of Nitrogen	70% less Ozone forming potential
87% less Ozone forming potential	60% less Carbon Monoxide
10% less Carbon Dioxide	

* Based on tests undertaken at the independent Millbrook Vehicle Emissions Laboratories (UK) in 1998 and 1999.

Advantages of ALPG

Can be used in Passenger cars, three wheelers and two wheelers.

Can be easily transported and stored in stand-alone facilities.

LPG is pressurized as 7-10 bars as against 200 bars for CNG, which makes it safe and conventional fuel.

How safe is LPG in automobiles?

Unlike CNG, which is pressurized at 200 bars, LPG is pressurized at just 5-7 bars, which makes it as safe as conventional fuels. The automotive use of LPG has an excellent safety record and various crash tests and fire tests have proved that, owing to the strength and integrity of the fuel tank, it is safer than petrol and on a par with diesel. The conversion of vehicles to LPG has, of course, to be undertaken by a competent person working in accordance with the prescribed standards.

WLPGA-IAC Sub Continent Regional Summit, February 2012

The World LP Gas Association, in collaboration with Indian Auto LPG Coalition, organized its first ever Sub-Continent Regional Summit "LP Gas: Exceptional Energy for the Sub-Continent" and the WLPGA Good Industry Practices Workshop on February 15 and 16, 2012 in New Delhi. Over 250 participants from more than 30 countries attended the two days of events making this one of the most successful LP Gas Events in India and WLPGA Regional Summits ever held. The Event was hosted by IAC and supported by Indian Oil Corporation Limited, Bharat Petroleum Corporation Limited, and Hindustan Petroleum Corporation Limited.

The event was inaugurated by Shri. Sudhir Bhargava, Addl. Secretary, Ministry of Petroleum and Natural Gas with a keynote address by Shri. R.S. Butola, Chairman, Indian Oil Corporation Limited alongwith Mr. Ramon de Luis Serrano, President, WLPGA and Mr. James Rockall, MD, WLPGA at the Summit. The event also featured a special Key note Address by Shri. Nandan Nilekani, Chairman, Unique Identification Authority, India.

Booklet on Safe Practices / Checklist for LPG Operated Vehicles :

With the growing popularity of Auto LPG vehicles in India and taking into consideration that most of the cars are retrofitted, need was felt to educate the ALPG consumers and also the Transport Department officials on various aspects to safe fitment and usage of this alternate fuel in Vehicles. To help in this initiative a " Booklet on Safe Practices / Checklist for LPG Operated Vehicles" was prepared by IAC in coordination with ARAI. This booklet was released by Mr. S.D. Shinde, Transport Commissioner- Maharashtra in Aurangabad during the Seminar on " Inspection and Safety – Key to Successful and Prosperous Auto LPG Industry in India".

The ready reckoner is being extensively used by field officers from the Motor Vehicles Departments of various states in India.

All India ALDS Directory :

There are more than 1000 Auto LPG dispensing stations (ALDS) covering more than 500 towns and cities in India. Need was felt to have a comprehensive Industry ALDS directory giving state wise ALDS addresses for the convenience of motorists using Auto LPG. The same was compiled and printed by IAC in the form of a directory. The Directory was released by Chief Controller of Explosives during the PESO –IAC Workshop on Safety in Nagpur.

10,000 copies of the ALDS directory were printed and arrangements were made to send the same to all ALDS in India for distribution to the ALPG customers, Retrofitment centres and vehicle showrooms.

The Green Journey

Auto LPG Dispensing System & Calibration – Training Program for officials of Legal Metrology at FCRI-Palakkad.

During IAC's meeting with Director – Legal Metrology, IAC had expressed desire to be associated with any training program the department wished to conduct on Auto LPG. The opportunity came when Fluid Control Research Institute (FCRI) extended invitation to IAC to conduct a session on "Auto LPG Dispensing System and Calibration" for Officials of Legal Metrology Dept.

IAC conducted a detailed training at FCRI's campus in Palakkad (Kerala) for about 60 officers of legal

Metrology who came from across the country. Each training program comprised 2 ½ hours presentation and interactive session on Dispenser calibration followed by 3½ hours practical demonstration at RIL's Auto LPG dispensing station in Palakkad.

Domestic LPG Vs Auto LPG :

Presently the Auto LPG industry is battling with the widespread menace of diversion of cooking gas cylinder for automotive use. This is not only illegal but also unsafe and results in huge losses to the Government exchequer.

As one of the initiatives taken by IAC to curb the diversion activity, it has designed a comprehensive leaflet explaining the ill effects of using domestic LPG in vehicles. It is proposed to print thousands of these leaflets and distribute the same to all LPG vehicle owners, retrofitters, OEM showrooms across the ALPG markets in India.

Campaign against use of Domestic LPG for Automotive purpose in Namakkal.

To curb illegal transfer of Domestic LPG for automobile use, IAC along with the active support of District Administration of Namakkal launched a social awareness campaign. Billboards and posters were put up at strategic location in the town; advertisements in local cable TV Channels were also flashed. The communication was designed in such a way, so as to deter people from indulging in the illegal and hazardous activity of Gas transfer.
